

Client: **London Cycle Hire Scheme**

Location: **London**

Project: **ICT Support**

The London Cycle Hire Scheme consortium won the bid to provide 60,000 cycles throughout London for short-term public hire. We set up the project management office and are supporting up to 100 users a day. This includes providing instant desktop support to all users on site and those working remotely, even at home.

We have provided all their servers, printers, internet access and intelligent white boards. In addition, London Cycle Hire can rely on our expert support services 9 till 5, five days a week with four hour on site response.

We are now moving forward with the team and providing consultancy for their new permanent office in North West London, where they will be relocating next summer
